

Where can you get your own glasses made on the same day or Under an Hour?

10 Years ago many places use to do this in the UK, but I have been unable to find places in the UK that will do this. In the USA this is not uncommon and stores can still be found.

It is worth checking with your **own Optometrist first**, as they may be able to make a quick pair with in 24 hours or the same day. My own optometrist was able to do this in our family emergency for instance.

If you need is desperate then I have found and if you are in need of prescription glasses in under an hour. It was recommended by one of my patients.

FASTLENS LIMITED

Wholesale Spectacle Makers open to the public

80 MOWBRAY PARADE EDGWARE WAY EDGWARE MIDDLESEX HA8 8JS.
