

PF DROPS™

Sodium Chloride 5% Preservative Free Eye Drops

At last, there is a cost-effective, prescribable, preservative free multi-dose Sodium Chloride 5% solution for the alleviation of the symptoms of corneal oedema.

PF DROPS™ Sodium Chloride 5% is presented in an innovative and patented Ophthalmic Squeeze Dispenser (OSD) and is a hypertonic ophthalmic solution indicated for the temporary alleviation of corneal oedema symptoms.

The Key features of PF DROPS™ Sodium Chloride 5% Eye Drops are:

- Prescribable CE marked medical device for corneal oedema symptoms
- Preservative free
- Phosphate free
- Multi-dose Ophthalmic Squeeze Dispenser (OSD)
- In-use life 60 days from opening

The OSD is an easy-to-use and reliable eye drop bottle which effectively prevents microbial contamination of the sterile contents for up to 60 days after first use, allowing a true preservative free formulation.

Much lower costs than unlicensed specials!

As the newest and lowest priced Sodium Chloride 5% eye drops product on the market, it promises to be a game changer.
