

My favourite Home blood pressure Monitor that I use as well. It is so easy to use, no tubes, just wraps around the upper arm. Press button and the machine takes the reading. One click of the link button and the readings are transferred to your smart phone to store the results for you and your doctor to Review. However if using This feature you cannot share the blood cuff with anyone else, otherwise their Readings get mixed with yours.

OMRON EVOLV All-In-One, Wireless, Upper Arm Blood Pressure Monitor -

by Omron

- Wrap it on. Press a button. Take control of your cardiovascular health
- Measuring your blood pressure - at home or on the go - has never been easier thanks to EVOLV's compact and sleek design; It's as simple as pressing "Start"
- Never second guess a reading with OMRON's unique Intel Wrap Cuff Technology which ensures an accurate reading, every time - in a position around your upper arm
- Use your readings to get a better understanding of your health by tracking and sharing your results in the "OMRON connect" App
- View your blood pressure results clearly on EVOLV's built-in HD OLED display, even when taking readings at night
