

When standard illuminated hand magnifiers do not give enough magnification it is time to consider and electronic one that can magnify from x2 up to x 32.

These use to be large and expensive, but now have come right down in price selling from £60 upwards. Amazon for instance carries a wide range with the added benefit of reviews. As this is mail order you can always send it back if it does not suite you or even sell it back on Amazon after you no longer have use for it.

Some selections from Amazon are below and the keyword to use for searching is (4/1/17)

portable electronic magnifier

I would recommend looking at the reviews first before purchase.
