

Do you find yourself struggling to read for any length of time?

Revolutionary reading light gives you back crystal clear clarity.

30 days risk free home trial

“It's like having a brand new pair of eyes!” Ms Sherliker

Serious Readers is a British company totally dedicated to the purity of light and as our name implies we take it rather seriously. So much so, we design and build our reading and task lights like no other.

TVs aren't the only technology to use high definition

A Serious Readers Light offers incredible clarity and brightness. In fact, our lights are used by surgeons, forensic scientists and fine art restorers – basically anyone who needs to see clearly and accurately.

The smaller the text the greater the clarity

Small text is a test for both light and eye and with a Serious Readers Light this is where you'll really notice the difference. Everything looks sharper, clearer and easier to read. Fine detail is more defined and colour has a new vibrancy and richness.
