

Michael Gross Consultant Neurologist

I have suggested that you see Dr Gross who is a consultant neurologist that has worked at the Clementine Churchill hospital for many years. He works on the Wednesday morning alongside myself in the outpatient Clementine Churchill hospital so I have got to know him very well. I highly respect his opinion and attention to detail and he has personally seen several of my family. Thus I can highly recommend him.

He also has his own website when more information about his professional experience can be found. www.neurologyclinic.org.uk

To make an appointment to see him please phone his office on:

Telephone : 020 8861 1777
Fax: 0208 863 7124
Email jl@neurologyclinic.co.uk

Secretary Mrs Jo Lack on 0208 872 3838
Correspondence address: 264, High Road, Harrow Weald,
Middx, HA3 7BB

Dr Gross consults on a Monday morning, Wednesday morning, Thursday afternoon and evening at The Clementine Churchill Hospital.

Further information about his Practice.

He deals with all aspects of the nervous system with a particular interest in headache disorders, fits, faints and funny turns as well as dizziness and balance problems. He also frequently gives opinion in patients who have multiple sclerosis, stroke, neuropathy, Parkinson's disease and head injury.

CV: Michael graduated from Cambridge University (Sidney Sussex College) before attending the Royal London Hospital for clinical studies. He trained at the Royal Free, the Hammersmith, St. Mary's and the National Hospital for Neurology and Neurosurgery.

In 1990 he was appointed consultant neurologist at the Royal Surrey Hospital and then elected Chairman of Neuroscience in 1991.

He has carried out extensive research and published a range of neurological conditions.

In 1998 and 1999 he was short-listed as the UK 'Hospital Doctor of the Year'. From 2001 he has been full-time in the private sector. Michael has two full-time offices, one in Harrow and the other at the Spire Hospital Gatwick Park in Horley. His team do everything possible to answer all enquiries speedily and smooth the patient's pathway. Letters go out to referring GP's often on the same day as being seen.

Michael was the clinical director of a neurology research unit for eleven years. He has lectured extensively on many neurology subjects to learned societies worldwide. This has helped fuel his passion for travel and photography.

He has been the Chairman of Neurosciences User Groups at the various hospitals where he has practised. He is accredited in both clinical neurology and clinical neurophysiology and has acted as a clinical lead for neurophysiology and balance testing. He regularly acts as an expert witness in high profile Court cases. As he says, this really keeps you up to date and very focused on clinical practice.

Michael holds the opinion that patients need to be kept at the centre of the health care Universe and not moved to the outside as so frequently happens outside the private sector.
