

EyeCee One[®]

The Flagship Preloaded Intraocular Lens

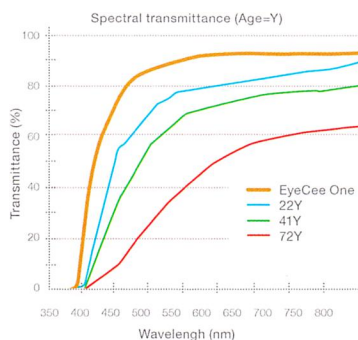

Quality of vision meets ease of use

Fully preloaded hydrophobic IOL with innovative design to provide convenience for you and quality of vision for your patients

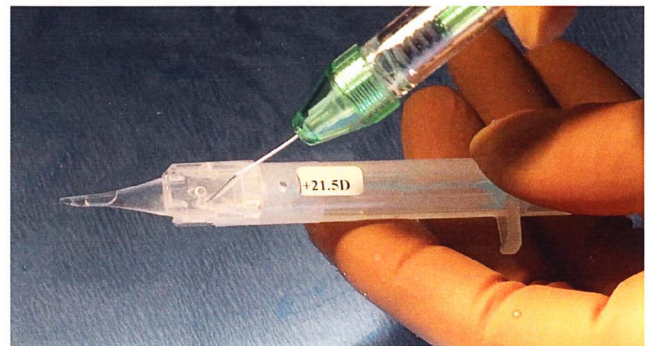

QUALITY OF VISION

- Sandblasted-like optic edge for **reduced post-operative glare**
- Sandblasted-like haptic surface to **reduce haptic adherence**
- 90° anchor-wing haptics to **improve capsular bag fixation**
- 360° sharp edge to **reduce risk of PCO**
- Dense polymer network using a unique method of monomer impregnation to **reduce glistenings**
- Innovative blue light filtering for **optimal contrast sensitivity**
 - Reduces risk of retinal damage
 - EyeCee One's blue light transmission curve behaves similarly to that of the crystalline lens

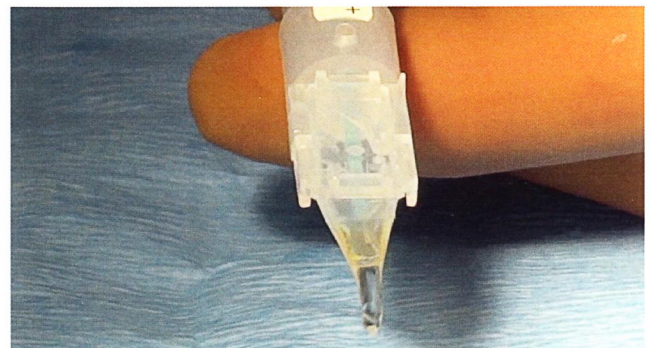

EASE OF USE

FULLY PRELOADED IOL IN ONLY 2 SIMPLE STEPS

1. Fill with Viscoelastic

2. Inject
