

An Effective Low Cost Reading Aid

- The Geddes Glide Reader enlarges print, pictures, and objects placed under it using a high quality colour camera.
- The image is displayed on your television.
- Adjust the magnification to suit your needs.
- Slide it over a page you want to enlarge.
- Attach it to its stand to make writing easier, see small objects using both hands, or try hobbies.

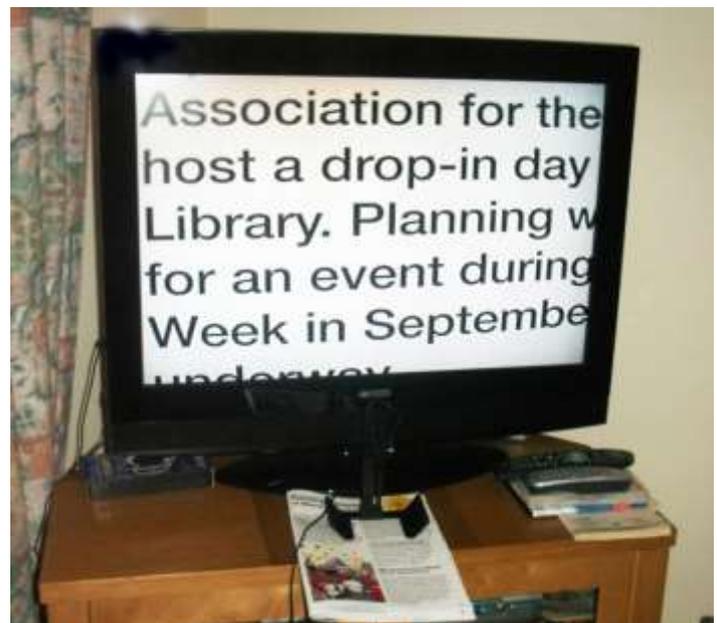

This simple but effective low cost Reader is made on a not-for-profit basis by a team of volunteers who all have someone close to them with sight problems. We want to help people with impaired sight, read and write again. It was designed by Les Geddes, a retired engineer, to help his wife when her sight was impaired by Macular Disease.

We are happy for you to try the Reader for a week or two to see if it helps you. If it does not, you can return it free.

It costs us £80 to make a Reader, so we ask for a minimum donation of £80 if you keep it.

For more information go to geddesreader.wordpress.com

To order a Reader, or if you have any questions please email or phone Ian. Contact details below.
